- To **be part of teams** working on projects, developing **good rapport and friendships**, brainstorming, planning and delivering quality products.

COVER LETTER

Hi. I'm Krishnan. Currently, I focus on mastering **Web App Development from end to end** with various stacks and frameworks. I plan on broadening my spectrum to other technologies, platforms and domains eventually. I'm passionate about this and have the **experience** of working in **different web technologies and frameworks** on a **variety of projects - open source and client work**, as part of **teams in multiple organizations**, and also **independently** as an individual.

I have experience handling / being part of **every phase of a project** - right from brainstorming ideas to deployment and maintenance, in **professional structured work environments with teams for large projects** and **independently for freelance client works** - on **live projects or from the ground up**, utilizing a variety of modern technologies and methods.

The **evolution of AI LLMs** has significantly transformed the associated **skillsets** and updated the processing **workflows** within **IT Projects in the Corporate Tech Industry**. Even though I have a gap of more than 2 years on my corporate career, I have actively kept myself informed and in practice of these changes to ensure that I remain relevant to the **New Standards of Web Development** and its associated tasks, as I prepare to make a **comeback on my career** and re-enter the workforce.

It's the **aspiration for my career** to **be part of teams**, building a rapport, working, completing missions, having fun, achieving big and celebrating together. So, I look forward to **new opportunities** where I can best use my skills for the success of the team and organization, thus resuming and catapulting my career onto greater heights and achievements.
